No staining	Primary color
Dyeable	Support for other colors
Hair quality	Flexibility
Place of Origin	China
From people	18 to 30 years old

Suitable for people

Performers, fashion crowd, sparse hair, baldness, etc

FAQ:

Q: What is the advantage of synthetic hair extension comparing real hair?

A: Many people make the mistake of thinking that human hair extensions are better than synthetics hair extensions. This is a common misconception.

- 1) Human hair extension are much more expensive than synthetic extensions.
- 2) Human hair extensions require a great deal of care. They must be styled daily, washed more often, and are generally higher maintenance than a synthetic hair extension.
- 3) Human hair extensions usually require trimming and styling by a hair stylist before they can be worn. Synthetics come pre-styled and pre-cut and will hold their shape even when washed. Much easier for the average consumer
- 4) Since synthetic extensions are more economical, you can afford to change your style when you get tired of your current look.

Q: Where should I start and what steps do I take?

A: Step 1: Measure your head. When you have determined what size cap you need, you can browse for hair extensions in the correct category.

Step 2: Select your style. Browse through our catalog and determine which styles best fit your needs. Make sure that you are browsing through the appropriate size categories. In this step, try to ignore the colors the extensions are pictured in and look at the style only. Most hair extension styles are available in at least 25 different color choices. Each hair extension will have its own selection of colors. You cannot choose the color until you have completed step 2.

Step 3: Select your color. The last step (and often the most difficult) is choosing your color.

Q: How do I style my hair extension?

A: Your hair extension can be styled using a wig brush, a wig comb, or your fingertips. Avoid using a brush designed for human hair. These brushes can create excessive tension, over-stretching the hair with abrasive strokes that may damage the hair. The hair extensions we carry are shake & wear and can be styled by simply using a wide tooth comb or your fingertips. The best styling tools are the most inexpensive ones; a spray bottle of clean, cool water. Lightly spring your hair extension with water to remove static electricity and return your hair extension to its original look.
